Corporate Profile

FSL Projects Limited is a global Software Outsourcing and Offshore Development company providing specialized Product Development and Product Re-engineering services to enterprises all over the world.

Established in 1999 with its Development center located in Hyderabad, India. FSL is a dedicated Software Outsourcing and Offshore Development firm providing Outsourced Product Development services to enterprises worldwide. Combining the benefits of Offshore Outsourcing with its recognized expertise in Product Development as well as Product Reengineering, we deliver unmatched value.

FSL partners with its clients to deliver value, in terms of quality and cost. We endeavor to bring together the best management and technical professionals with the most excellent skill sets, expertise, qualification and experience. We work as a team, approximating a virtual extension to the client's development/maintenance support organization or product groups, thereby helping to bring cost economics to an optimal level and stabilize resource utilization.

FSL focuses on full life cycle software projects and has developed Numerous E-commerce/Web Application projects for our clients. We work on Internet Technologies and partner with customers for customized software development and ongoing project maintenance needs. Whether a personalized e-commerce solution, a scalable Internet portal, or database application. FSL has an excellent reputation of completing projects on time and within budget with excellent quality.

Why us

- Classify your customers along family structures, financial status, lifestyles and risk profiles.
- We Focus on strong process and customer centric approach Clear, prompt & focused communication process.
- High quality software. We are committed to providing quality, security and privacy to all our customers.
- Adaptable development teams. Our software development teams are flexible and can be resized and readjusted anytime upon customer's request.
- Rich experience. Since 1999 FSL has successfully completed several custom software development and quality assurance projects.
- Give your clients the best in investment, retirement, protection, tax, inheritance, financing etc.
- Highly manageable processes. Our clients can control the project implementation at any stage.
